

PULSE: Fleet Risk Health Check

A comprehensive and actionable fleet risk health check for your business covering policies, drivers, vehicles and journeys.

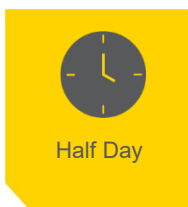

Highlighting good practice and areas for action – in particular where there are indications that you are not conforming to legal requirements. PULSE can help kickstart a new focus on driver risk management in your business or re-start an existing programme that might need checking and re-calibrating to improve momentum and drive new actions.

Features and Benefits

- **Identify & prioritise compliance, duty of care issues and non compliance** across key fleet areas – policies, drivers, vehicles and journeys
- **Comprehensive** – covers ALL vehicles - from cars to commercial vehicles including 3.5t+ vehicles
- **Measurable, easily interpretable results** – RAG dashboard with clear risk ratings
- **Benchmarking** of results across e.g. depots, business units and/or peer groups
- **Recommendations to address specific issues in priority order** - including best practice guidelines and consequences of non-compliance
- Includes **follow-up health check** after 6-12 months to show measurable improvements

How does it work?

- **Pre-visit questionnaire** – collect information in advance of face-to-face
- **Face-to-face visit by trained fleet risk assessor** – multi-site or single site
- **Written comprehensive report** – with RAG, dashboard, tables and easy-to-highlight areas for action and priority indicated and clear risk-ratings
- **Recommended action plan**
- **Follow-up contact by DriveTech's fleet team** (after 6-12 months) to follow up on actions delivered

How will this help you?

Duty of Care

- **Companies have a duty of care to act on visible data** – you are liable for your drivers' safety at work. Non-action could result in hefty fine and even prison
- **PULSE will give you a clear action plan to address specific issues in priority order** – ensuring your level of compliance meets mandatory and legislative needs
- **PULSE can help kickstart a new focus on driver risk management in your business or re-start an existing programme** that might need checking and re-calibrating to improve momentum and drive new actions.”

Cost Savings

- **Long-term cost-savings** will be realised from reduced insurance premiums and fewer bent metal repair costs

Quick & Easy

- **Pre-survey** – designed to capture as much information up front, with the added benefit of cutting down on the face-to-face time needed
- **Face-to-face** - max of 3 hours, at a time convenient for you
- **Not an audit** – documentation does not need to be supplied as evidence

Tailored to you

- **The health check is conducted using a consultative approach**, allowing the assessor to understand how your company operates - a blanket approach cannot cater for any individual fleet characteristics
- **A trained and independent assessor** with experience in fleet/road safety, will combine their expertise with their founded knowledge of your business operation to create a custom report and action plan built for you
