

# Driver Assessment

Driver Assessments are a key component of a comprehensive road risk strategy. They also identify drivers who, due to their driving activities, history, attitude and knowledge, may be exposed to higher risks while driving. By identifying 'at-risk drivers', the organisation can target their training, reduce collision rates and resulting operating costs, as well as meeting their duty of care obligations and minimising their potential exposure to corporate manslaughter legislation.

## Driver Assessment

Driver Assessments are designed to help you meet duty of care obligations under HSE legislation. They help you to make 'reasonable' attempts to assess your employees' exposure to risk while driving – typically high, medium or low and therefore identify which of your drivers are 'at risk'.

## Our approach

We believe that the method of assessment is dependent on each customer's needs. That's why we offer market-leading assessments online and on-road. Indeed, some customers may benefit from a 'mixed-delivery' driver assessment programme.

- **online** – our AssessOnline assessments enable a driver's exposure to risk to be identified via our website. No formal booking or driving is required as the site is accessible 24 hours a day, 7 days a week.
- **on-road** – Through a combination of pre-driving checks and a one hour onroad practical driving assessment with a fully trained driving assessor, this approach can provide more human interaction and discussion. It is particularly suitable for drivers where web access is impractical.

## Benefits to you

**Our assessments help you to:**

- **meet your duty of care obligations**
- **reduce fleet operating costs** - through improved driving skills
- **reduce the collision rates/vehicle abuse** - by improving driving techniques and awareness
- **save time** - by minimising manual intervention
- **target 'at risk' drivers** - via bespoke training opportunities to improve driving competence
- **provide results** - by reporting on driver's activities
- **ensure a continual improvement plan** - giving a sustainable improvement in road safety
