

# Online Management Information

FleetRiskManager is an online, occupational road risk portal that enables you to manage your duty of care programmes from your desktop. Comprising a comprehensive platform for administering company, vehicle and driver data, it enables you to manage, control and profile your driving community - keeping your fleet at your fingertips!

## Our approach

The FleetRiskManager platform enables you to quickly and securely set up driver access in line with your company structure. It also provides a comprehensive alerting facility to automate the process of 'chasing up' drivers for you. This helps ensure that your drivers comply with company policies and procedures. The real-time LiveView profiling capability empowers managers to identify appropriate interventions by combining a driver's individual results from all enabled risk modules.

## The driver journey

## Features at a glance

- LiveView real-time profiling
- suite of management reports
- supports hierarchical groups
- driver data upload tool
- scalable for any size fleet
- driver and manager alerts
- activity audit log

## Benefits to you

- single portal to manage your entire fleet
- driver focused - easy to use
- all driver information in one place
- roll out your duty of care programme to your driver community quickly
