

Fleet Risk Audit

Under the Health and Safety at Work Act 1974, employers have a statutory duty of care - that is, they are required - to carry out an assessment of the risks to the health and safety of their employees' and that 'includes any driving activity on the road'. In addition, many companies want to ensure that they reduce the risk of prosecution under UK Corporate Manslaughter legislation. A formal risk audit for all 'driving for work' activities will help identify areas of risk exposure and non-compliance.

Fleet Risk Audit

Our audit provides you with an evaluation of your current fleet risk exposure. By examining your existing management practices and procedures, it identifies appropriate systems and solutions to mitigate the risks associated with work-related driving. The audit encompasses all legal, financial and operational issues. It culminates in a detailed report, identifying key risk areas together with best practice recommendations for remedial action where necessary.

Our approach

- an audit is carried out face-to-face on your premises, dealing directly with the people responsible for your fleet operations
- depending on your fleet size, mix and complexity, an audit is typically half a day* at your premises interviewing key personnel involved in the day to day running of the fleet
- the data and information gathered at the audit are summarised and compared with key performance indicators to assess the effectiveness of your operations and the degree of risk involved
- on completion of the audit, we submit a full report with a list of recommended actions, together with information about other DriveTech services that are available to help you implement any necessary changes

Benefits to you

Our audit helps you to:

- **reduce your legal and financial exposure** - by identifying the risks your fleet faces
- **manage your fleet risk** - via a bespoke action plan
- **meet your legal requirements** - by acting on our recommendations
- **achieves optimum cost efficiency** - by applying best practice in fleet management
