

Improve Your Driver and Fleet Safety.

Global Driver Safety Solutions

Every year 1.35 million people die on our roads.

Many of these accidents involve people that are driving for work.

We all need to take responsibility to help reduce this figure.

Global Driver Safety Management.

A driver safety management programme will help your employees to stay safe, avoid collisions, save lives, reduce injuries and vehicle damages. As an integrated approach to driver and fleet safety, we use a behavioural based and scientifically proven methodology in our training solutions to gain maximum results.

- Up to **40%** of those deaths being **work-related**
- This was an increase of **840 deaths (+4%)** since 2021

About Drivetech.

Drivetech is the leader in global driver safety management and driver training. With a track record built over the last 30 years, Drivetech delivers fleet risk assessments, driver risk assessments and safe driving training in over 95 countries and online in over 35 languages.

Through consultancy services, behavioural based interventions and accurate reporting we help our clients to improve driver safety, reduce their fleet costs and carbon footprint. Our global network of the world's best local training providers is the key to any effective global driver safety programme.

Over 90% of all accidents are caused by human error, which is why Drivetech's programmes aim at changing driver behaviour. We have established a unique behavioural based coaching methodology that is consistent across the globe.

Our products and services improve driver safety, reduce fleet running costs and ensure compliance with CSR responsibilities.

By offering a range of fleet risk management services that can be tailored to your organisation's own requirements, our aim is to reduce our customers' fleet costs and drivers' risk exposure by significantly improving driver ABC - Attitude, Behaviour and Competence.

A Driver Safety Management Programme will help your employees to stay safe, avoid collisions, reduce the risk of injuries and vehicle damages.

Realise Tangible Benefits.

A comprehensive Driver Safety Management Programme can also realise tangible benefits for your organisation:

Reduction in
damages/
repair costs

6-35%

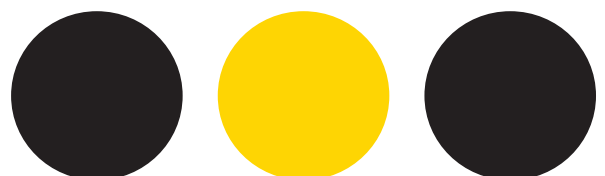

Reduction in
insurance
costs/ premiums

3-15%
